The System

REDUCE WASTE + REDUCE COSTS

INSTALL & MAINTAIN

Our qualified engineers will go to site and install and commission the fire equipment. For the duration of the project we will proactively monitor, maintain and service the equipment to ensure your compliance.

COLLECT & STORE

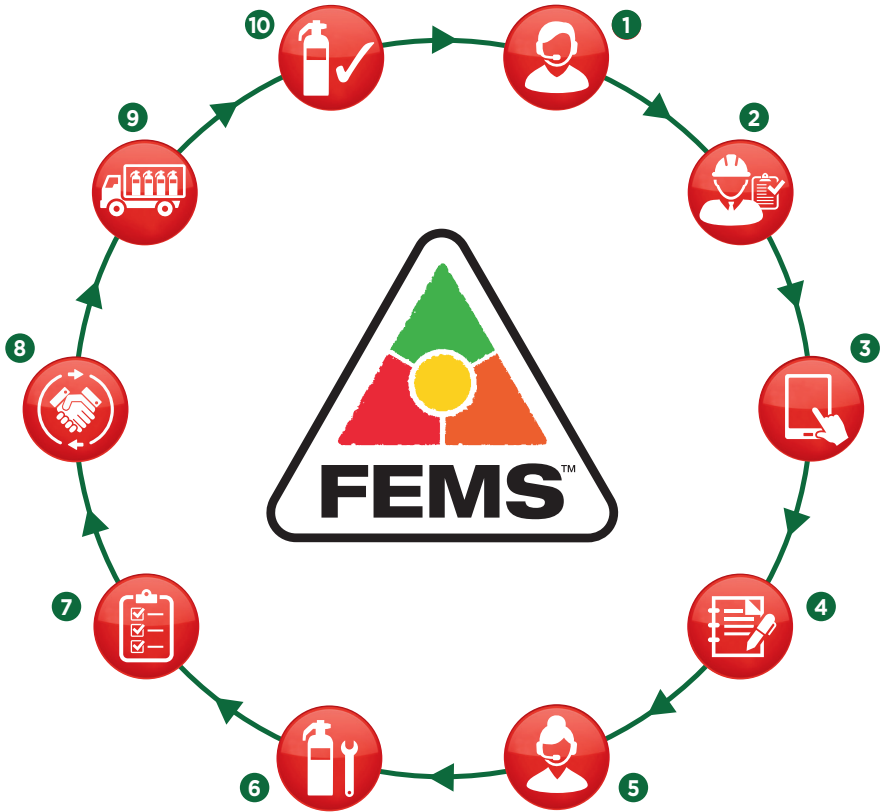

At the end of the project or particular phase we will remove all excess equipment from site. All items are carefully logged and brought back to our National Distribution Centre for assessment and secure storage.

REFURB & SERVICE

Our in house engineers will carry out a rigorous inspection of all equipment and provide a detailed report on any items that need refurbishment. Once approved these items are refurbished and put into storage ready to be called out to your next site.

FREE Storage There is no charge for storage for the first 6 months of an item being stored. If you need longer term storage for a particular item prices are available on request.

The Process

10 Steps to Sustainable Fire Equipment Management

- 1 New Enquiry
- 2 Site Survey
- 3 Products Specified
- 4 Quotation
- 5 Order
- 6 Install & Commission
- 7 In-use Servicing
- 8 Project Completion
- 9 Site Clearance to Storage
- 10 Refurbish & Service

Fire Extinguishers

Install & Maintain

- Quantity and type required specified.
- Extinguishers delivered to site.
- Fully commissioned by our trained engineers.
- Placed in agreed site locations to ensure full site coverage.
- Ongoing maintenance whilst in service.

Collect & Store

- Site extinguishers consolidated into holding area.
- Checked off against site asset list.
- Any missing items reported to you.
- All extinguishers collected regardless of condition.
- Removed from site to our storage.

Refurb & Service

- Extinguisher assessed and report raised by our in-house engineers.
- We provide you with recommendations and quote for remedials.
- Once approved, refurbishment carried out.
- All equipment securely stored ready for servicing at point of next use.
- Environmental disposal if required.

Wireless Fire Alarms

Install & Maintain

- Full site survey to assess scope and specify solution.
- Alarm system delivered to site.
- Placed in agreed site locations to ensure full site coverage.
- Fully commissioned by our trained engineers.
- Ongoing maintenance and support whilst in service.

Collect & Store

- Alarm system decommissioned.
- Checked off against site asset list.
- We provide a list of any missing items.
- All alarms and components collected regardless of condition.
- Removed from site to our storage.

Refurb & Service

- Alarms assessed by our in-house engineers.
- Report filled out for each.
- We provide you with recommendations and quote for remedials.
- Once approved, refurbishment carried out on approval.
- All alarms serviced and stored ready for next use.

Trolleys & Stands

Install & Maintain

- Specification and quantities recommendation.
- Site survey to tie in to extinguishers and alarm placement.
- Trolleys and stands delivered to site.
- Placed in agreed site locations to ensure full site coverage.
- Ongoing maintenance whilst in service.

Collect & Store

- Trolleys and stands consolidated into holding area.
- Checked off against site asset list.
- We provide a list of any missing items.
- All trolleys and stands collected, regardless of condition.
- Removed from site to our storage.

Refurb & Service

- Trolleys and stands assessed by our in-house engineers.
- Report filled out for each item.
- We provide you with recommendations and quote for remedials.
- Refurbishment carried out on approval.
- All trolleys and stands serviced and stored ready for next use.

*Free storage for 6 months. Cost per item thereafter.

Customer Feedback

/// Excellent way to save time, money and helps towards our sustainability goals. ///

Health and Safety Manager, Main Contractor, London

/// Great system - it's saved us thousands of pounds every year. ///

Procurement Manager, Site Logistics, Bristol

/// Thank you for introducing FEMS to us - we've never kept so much equipment in circulation as in the past 6 months. Good for the environment and very kind on the pocket. ///

Contracts Manager, Major Housebuilder, Cambridge

Nationwide Coverage

Our nationwide network of engineers are fully trained to survey, install, maintain and service our full fire equipment range.
